Dr. Joshua Lederberg,
Department of Genetics,
University of Wisconsin,
Madison, Wisconsin.

Dear Dr. Lederberg:

In the summer of 1950, I had the opportunity of attending your course in bacterial genetics at the summer school of the University of California at Berkeley. Since that time I have devoted a few lectures of my teaching in the senior course in microbiology to giving some concepts of microbial genetics to the students. We now wish to incorporate a section on genetics into the graduate course in microbial metabolism. To this end I would appreciate receiving your available reprints on the subject and would ask that you add my name to your mailing list for future reprints.

I understand that you have a text on microbial genetics in press. Could you give me an approximate time when this will be available?

Thank you very much for your kindness.

Yours very truly,

NORA NEILSON,
Assistant Professor of Dairying.

McC
